

I'd like to file a complaint on the whole Democratic party for allowing support of a movie a year before the election smearing President Bush.

And, also against Michael Moore for releasing this documentary that is filled with lies and deceit to the American public.

Also, to against the American media for pushing there opinions onto the public. This is a very serious violation of American standards. The media and Television should no longer be aloud to run the politics of the United States. Especially, lieing to the public calling the Policing of Iraq the War on Iraq when we all know full well that the war ended over a year ago in April or May of 2003.

I would also like to comment on the Sinclair Broadcasting Company that since the FCC allowed Fahrienheit 911. That the FCC should not block the airing of a documentary showing Senator Kerry after he returned from Vietnam.

Signed,

Edward C. Yelinek
